a **Which part is needed where: drop one, train again, test at the long length**

	S5 16 to 1,024	stories 16 to 1,024	Lean 8 to 1,024	addition 32 to 4,096	counting 32 to 4,096	programs 16 to 1,024	reversible 16 to 4,096
all parts (M)	10/10	10/10	10/10	10/10	10/10	9/10	10/10
without aimed contraction	5/10 p = 0.016	10/10	10/10	10/10	10/10	9/10	10/10
without certified equivalence	4/10 p = 0.005	0/10 p < 0.001	10/10	8/10	1/10 p < 0.001	3/10 p = 0.010	7/10
without the closure	9/10	0/10 p < 0.001	10/10	0/10 p < 0.001	0/10 p < 0.001	0/10 p < 0.001	0/10 p < 0.001

exact at the test length ○ not exact fewer exact seeds than M, one-sided Fisher p < 0.05 before correction; 7 of 22 tests survive Holm

b **Each failure takes one of the theorem's two routes**
